

To Request An Appointment Using Showing Assist

Once ShowingTime is activated, when a listing is viewed in Stratus, agents can click on an activated listing, and request a showing any time they're online.

On the consumer site, www.mlsli.com, consumers would click

[Request a Showing](#) on activated listings.

When the showing request process is complete, e-mail notifications are sent automatically to the listing agent/office and to the showing agent; the listing agent or an office representative then confirms the showing by phone.

Interactive calendar displays available hours; click any white cell to request a showing.

Verify your contact information; optionally add a note for the listing agent/office.

E-mails go to the showing and listing office/agent. The listing representative confirms by phone.
